Climate film fest at MOP Vaishnav

Chennal: Seventy five per cent of all disasters are climate related, said Governor K. Rosaiah at the inaugural function of 'Clima 2014' held at Raj Bhavan on Thursday. "It is imperative that a strategy is developed on creation of a clean path way to embark on low emission and to prioritise our investment in ecosystems that sustain us," Rosaiah said. The film festival that would be held on September 12-13 at MOP Vaishnav College will throw light on various aspects of climate changes. The 2-day festival will consist of film screening, debate and satire on environmental issues. "Foreign TV channels have dedicated slots that give free space for public service and awareness films while India does not host one. A combined effort by people and organisations can help achieve the ecological balance that is losing its ground to pollution," said Alka Tomar, film director, Clima film festival 2014.
